EXPERTISE SKILLS

- Civil engineering
- Infrastructure surveying
- Data management
- Project oversight
- Team leadership
- Surveying software

LANGUAGES

- English
- Spanish
- French

CERTIFICATION

- Bachelor of Engineering in Civil Engineering, University of Toronto, 2016

MICHAEL ANDERSON

LEAD GEOMATICS SURVEYOR

Innovative Geomatics Surveyor with a robust background in civil engineering applications and land development. Proficient in employing state-of-the-art surveying technologies to deliver accurate, timely, and actionable data for infrastructure projects. Recognized for exceptional analytical skills and the ability to translate complex spatial information into meaningful insights for stakeholders. Expertise in managing large-scale projects, ensuring compliance with regulatory frameworks while maximizing resource efficiency.

PROFESSIONAL EXPERIENCE

CivilWorks Engineering

Mar 2018 - Present

Lead Geomatics Surveyor

- Oversaw surveying operations for major civil infrastructure projects, including highways and bridges.
- Implemented precision measurement techniques to enhance project accuracy.
- Collaborated with design teams to ensure alignment between surveying data and engineering plans.
- Prepared detailed project documentation and presentations for stakeholders.
- Managed project timelines and resources, consistently meeting deadlines.
- Conducted training sessions for staff on new surveying technologies and software.

Urban Dynamics

Dec 2015 - Jan 2018

Surveying Intern

- Assisted in surveying activities for urban development and land subdivision projects.
- Collected and processed data using traditional and digital surveying instruments.
- Supported the preparation of survey reports and legal documents.
- Participated in site visits to gather data and assess project needs.
- Maintained accurate records of survey findings and methodologies.
- Engaged with clients to clarify project specifications and requirements.

ACHIEVEMENTS

- Led a project that received the Engineering Excellence Award in 2021.
- Increased surveying efficiency by 40% through process optimization.
- Successfully integrated new technology, resulting in enhanced data accuracy.
