WORK EXPERIENCE

Geriatric Care Development Manager

2020-2023

Innovative Aging Solutions

- Managed the development and execution of geriatric care programs focused on patient-centered outcomes.
- Conducted market analysis to identify gaps in elderly care services.
- Collaborated with healthcare professionals to design effective care strategies.
- Implemented training programs for staff on geriatric health issues.
- Utilized patient feedback to enhance service offerings and program effectiveness.
- Advocated for policy changes to improve access to geriatric services.

Geriatric Health Research Analyst

2019-2020

Center for Aging Research

- Conducted research on geriatric health trends and outcomes.
- Analyzed data to inform program development and policy recommendations.
- Collaborated with academic institutions to publish findings in peer-reviewed journals.
- Presented research findings at national conferences on aging.
- Developed grant proposals to secure funding for geriatric health projects.
- Facilitated workshops to disseminate research insights to healthcare professionals.

ACHIEVEMENTS

- Secured a \$100,000 grant for a geriatric health initiative aimed at improving patient outcomes.
- Published research on aging-related health disparities in a leading journal.
- Developed a community health program that increased participation by 70%.
