PROFILE

An innovative Greenhouse Horticulturist with a focus on organic farming and sustainable practices, bringing over 8 years of experience in greenhouse management and crop production. Expertise in developing organic cultivation techniques, enhancing soil health, and maximizing yield through eco-friendly practices. Proven ability to lead projects that promote biodiversity and environmental stewardship.

EXPERIENCE

HEAD OF ORGANIC CULTIVATION

Sustainable Growers Co.

2016 - Present

- Developed and managed organic cultivation protocols for a 50,000 sq. ft. greenhouse.
- Implemented crop rotation and companion planting to enhance biodiversity.
- Trained staff on organic certification processes and best practices.
- Introduced soil health monitoring systems, improving nutrient management.
- Led community workshops on sustainable horticulture practices.
- Collaborated with local agricultural organizations to promote organic farming.

GREENHOUSE ASSISTANT

Urban Greenhouses

2014 - 2016

- Supported daily operations in a busy urban greenhouse environment.
- Assisted in plant propagation and nursery management.
- Monitored plant health and reported issues to senior management.
- Participated in the development of educational materials for community outreach.
- Maintained cleanliness and organization within the greenhouse.
- Engaged with customers to provide horticultural advice and support.
