

# MICHAEL ANDERSON

## LEAD METALWORK DESIGNER

### PROFILE

Accomplished Handcrafted Metal Worker with a specialization in architectural metalwork and a career spanning over a decade. Distinguished by a robust portfolio of projects that encompass residential and commercial developments, showcasing a deep understanding of structural integrity and aesthetic appeal. Expertise in welding, metal bending, and finishing techniques, coupled with proficiency in modern fabrication technologies.

### EXPERIENCE

#### LEAD METALWORK DESIGNER

##### Steel & Stone Construction

2016 - Present

- Designed and fabricated custom railings and gates for residential properties.
- Coordinated with architects to ensure seamless integration of metalwork in building designs.
- Established project timelines and budgets, consistently delivering projects on schedule.
- Conducted site inspections to confirm compliance with safety standards.
- Utilized MIG and TIG welding techniques to ensure durability and aesthetic quality.
- Created detailed project documentation, maintaining transparency with stakeholders.

#### METAL FABRICATOR

##### Precision Metalworks

2014 - 2016

- Fabricated structural components for commercial buildings, enhancing overall project integrity.
- Worked closely with engineers to develop solutions for complex metalwork challenges.
- Maintained tools and equipment, ensuring optimal performance and safety.
- Implemented quality assurance protocols, achieving a 98% defect-free rate.
- Participated in training programs to enhance skill sets among team members.
- Documented project progress and presented updates to senior management.

### SKILLS

- architectural metalwork
- welding techniques
- project management
- quality assurance
- collaboration
- safety compliance

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

ASSOCIATE DEGREE IN METAL FABRICATION, TECHNICAL INSTITUTE, 2011

### ACHIEVEMENTS

- Received the Excellence in Design Award from the National Metal Association.
- Successfully completed over 50 major projects with a focus on client satisfaction.
- Contributed to a significant reduction in project costs through efficient material usage.
