MICHAEL ANDERSON

SENIOR HEALTH ECONOMIST

Strategic Health Economist with a robust background in global health and resource allocation. Expertise in assessing the economic impact of health programs in low- and middle-income countries, utilizing both qualitative and quantitative research methodologies. Proven ability to work with international organizations to develop cost-effective health policies that maximize health outcomes. Recognized for strong analytical skills and the capacity to synthesize complex data into actionable recommendations.

PROFESSIONAL EXPERIENCE

World Health Organization

Mar 2018 - Present

Senior Health Economist

- Evaluated health programs in developing countries to determine cost-effectiveness and sustainability.
- Collaborated with local governments to design health interventions based on economic findings.
- Utilized econometric models to analyze health data and inform policy recommendations.
- Presented research outcomes to global health stakeholders at international conferences.
- Developed training programs for health economists in low-resource settings.
- Contributed to policy briefs that guided international funding allocation for health initiatives.

Global Fund

Dec 2015 - Jan 2018

Health Economist

- Conducted economic assessments of HIV/AIDS and malaria interventions to guide funding decisions.
- Collaborated with data analysts to ensure accuracy in health economic modeling.
- Prepared comprehensive reports on the economic impact of health projects across multiple countries.
- Engaged with stakeholders to discuss the implications of economic findings on health policy.
- Facilitated workshops to enhance understanding of health economics among local partners.
- Monitored and evaluated the effectiveness of funded health programs, providing actionable insights.

ACHIEVEMENTS

- Instrumental in securing \$50 million in funding for health programs through economic evaluations.
- Developed a framework for assessing health program effectiveness adopted by multiple NGOs.
- Published findings in international health journals, increasing awareness of economic factors in global health.
