-  San Francisco, CA

SKILLS

- Clinical Research
- Biostatistics
- SPSS
- Stata
- Data Analysis
- Regulatory Compliance

LANGUAGES

- English
- Spanish
- French

EDUCATION

MASTER OF SCIENCE IN BIOSTATISTICS,
HARVARD UNIVERSITY, 2014

ACHIEVEMENTS

- Achieved a 40% increase in patient recruitment for clinical trials through innovative outreach strategies.
- Secured over \$750,000 in research funding through successful grant proposals.
- Recognized for exceptional performance with the Employee of the Year award in 2019.

PROFILE

Results-oriented Health Research Scientist with 8 years of experience in clinical research and biostatistics. Expertise in designing clinical trials and analyzing data to support drug development processes. Skilled in using statistical software such as SPSS and Stata to validate research findings. Strong background in collaborating with pharmaceutical companies and regulatory agencies to ensure compliance with research protocols.

EXPERIENCE

CLINICAL RESEARCH SCIENTIST

PharmaTech Solutions

2016 - Present

- Led Phase II and III clinical trials for new drug development, overseeing participant recruitment and data management.
- Utilized SPSS for statistical analysis, producing reports that guided key decision-making processes.
- Coordinated with regulatory agencies to ensure compliance with clinical trial regulations and guidelines.
- Developed training materials for clinical staff, enhancing protocol adherence and data integrity.
- Presented research findings to stakeholders, improving transparency and stakeholder engagement.
- Authored and co-authored 8 publications in peer-reviewed medical journals, contributing to the scientific community.

BIOSTATISTICIAN

Health Analytics Corp

2014 - 2016

- Conducted statistical analyses for a variety of health-related research projects, enhancing data-driven decision-making.
- Implemented data visualization techniques to present findings effectively to non-technical audiences.
- Collaborated with researchers to design studies that meet both scientific and regulatory standards.
- Developed algorithms for data cleaning and preparation, improving data quality by 25%.
- Provided statistical consulting for grant applications, leading to successful funding of multiple projects.
- Trained junior analysts in statistical methodologies, improving overall team competency.
