## WORK EXPERIENCE

### Health Services Researcher

2020-2023

Healthcare Research Center

- Evaluated the effectiveness of health interventions on patient satisfaction and outcomes.
- Utilized Stata for data analysis, generating insights that informed policy recommendations.
- Collaborated with healthcare providers to design studies that assess service delivery models.
- Presented findings to policymakers, influencing health program implementations.
- Coordinated community engagement activities to gather patient feedback on healthcare services.
- Published 5 research articles on healthcare policy and management, enhancing knowledge in the field.

### Research Analyst

2019-2020

Public Health Agency

- Assisted in conducting research on health disparities in access to care among marginalized populations.
- Performed data cleaning and statistical analysis to support research initiatives.
- Collaborated with teams to develop grant proposals, resulting in funding for health projects.
- Prepared reports summarizing key findings for dissemination to stakeholders.
- Organized workshops to educate healthcare providers on best practices in patient care.
- Contributed to the development of policy briefs that addressed health equity issues.

## ACHIEVEMENTS

- Led a research project that resulted in a 20% improvement in patient satisfaction scores.
- Secured \$250,000 in funding for initiatives aimed at reducing health disparities.
- Published articles in leading health policy journals, contributing to the advancement of the field.
