### SKILLS

- Telemedicine
- Remote monitoring
- Patient engagement
- Data analysis
- Stakeholder collaboration
- Training development

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

**M.S. IN HEALTH TECHNOLOGY, JOHNS HOPKINS UNIVERSITY**

### ACHIEVEMENTS

- Led a project that increased telehealth utilization by 40% in target populations.
- Received the 'Telehealth Innovation Award' for outstanding contributions to the field.
- Published research in leading journals, enhancing awareness of telehealth benefits.

### WORK EXPERIENCE

#### TELEMEDICINE RESEARCH LEAD

Remote Health Solutions

2020 - 2025

- Oversaw research projects focused on the efficacy of telemedicine in rural populations.
- Developed and validated measurement tools for assessing patient satisfaction.
- Collaborated with technology developers to enhance telehealth platforms.
- Engaged stakeholders to promote the adoption of telehealth services.
- Presented research findings to governmental bodies, influencing policy changes.
- Authored guidelines for best practices in telemedicine implementation.

#### RESEARCH SCIENTIST

Innovative Care Technologies

2015 - 2020

- Conducted research on remote patient monitoring technologies for chronic disease management.
- Analyzed user data to identify trends and improve technology usability.
- Collaborated with healthcare providers to integrate technology into care workflows.
- Facilitated training sessions for healthcare professionals on telehealth tools.
- Presented findings at national conferences, fostering dialogue on technology in healthcare.
- Contributed to successful grant applications for telehealth research funding.
