Distinguished Healthcare Software Engineer with over 8 years of experience in the design, development, and implementation of innovative software solutions tailored for the healthcare industry. Expertise in leveraging advanced technologies to improve patient care and streamline operational processes. Proven track record of collaborating with cross-functional teams to deliver complex projects on time and within budget.

WORK EXPERIENCE

Senior Software Engineer | HealthTech Innovations   Jan 2022 – Present

- Engineered scalable healthcare applications utilizing Java and Spring Boot.
- Collaborated with clinical teams to gather requirements and translate them into technical specifications.
- Implemented data security measures in compliance with HIPAA regulations.
- Conducted performance testing and optimization of existing software solutions.
- Led a team of developers in creating an electronic health record (EHR) system.
- Facilitated Agile ceremonies and ensured adherence to best coding practices.

Software Engineer | MedSys Solutions   Jul 2019 – Dec 2021

- Developed and maintained web applications for patient management systems using .NET technologies.
- Collaborated with UX/UI designers to enhance the user experience of healthcare applications.
- Participated in code reviews and contributed to the establishment of coding standards.
- Assisted in the integration of third-party APIs for improved functionality.
- Trained and mentored new team members on software development processes.
- Documented software specifications and technical manuals for end-users.

SKILLS

Java   .NET   Spring Boot   Agile   HIPAA Compliance   EHR Systems

EDUCATION

Bachelor of Science in Computer Science   2015
University of Health Sciences

ACHIEVEMENTS

- Successfully led a project that reduced patient data retrieval time by 30%.
- Received the "Innovator of the Year" award at HealthTech Innovations for outstanding contributions to software development.
- Increased system uptime to 99.9% through proactive maintenance and upgrades.
