EDUCATION

**BACHELOR OF SCIENCE IN
INFORMATION TECHNOLOGY,
UNIVERSITY OF CYBERSECURITY, 2014**

ACHIEVEMENTS

- Developed protocols that improved the handling and analysis of digital evidence, reducing case turnaround time by 30%.
- Recognized for leading a successful investigation that utilized technology to solve a high-profile homicide case.
- Presented findings on cybercrime trends at national law enforcement conferences.

WORK EXPERIENCE

CYBERCRIME HOMICIDE DETECTIVE

Cyber Crime Unit

2020 - 2025

- Investigated homicide cases involving digital evidence, employing advanced data recovery techniques.
- Collaborated with cybersecurity experts to analyze online activity related to criminal behavior.
- Utilized forensic software to extract and analyze data from electronic devices.
- Developed and implemented protocols for handling digital evidence in homicide investigations.
- Trained fellow detectives on the integration of digital forensics into traditional investigative practices.
- Participated in community outreach programs to educate the public on cyber safety and crime prevention.

HOMICIDE INVESTIGATOR

City Police Department

2015 - 2020

- Conducted investigations into homicides, with a focus on digital evidence and cyber-related factors.
- Engaged with technology companies to understand emerging trends in cybercrime.
- Prepared detailed reports for court that highlighted the role of digital evidence in cases.
- Worked with prosecutors to ensure accurate representation of digital evidence in trials.
- Analyzed patterns in cyber-related homicides to develop proactive investigative strategies.
- Attended workshops on emerging cyber threats and their implications for homicide investigations.
