## WORK EXPERIENCE

### Health Innovation Manager

2020-2023

Tech for Global Health

- Designed and implemented health technology projects to improve service delivery in rural areas.
- Leveraged data analytics to inform decision-making and optimize program outcomes.
- Developed training modules for health workers on the use of technology in healthcare.
- Collaborated with local governments to integrate technology into health systems.
- Monitored project implementation and assessed impact on health access.
- Facilitated workshops to promote innovation in health practices.

### Program Manager

2019-2020

Global Fund

- Managed health programs targeting infectious diseases in underserved communities.
- Conducted epidemiological research to assess disease prevalence and health needs.
- Engaged with community leaders to foster trust and promote health initiatives.
- Oversaw program evaluations to measure effectiveness and inform future planning.
- Developed funding proposals to secure resources for health interventions.
- Prepared comprehensive reports for stakeholders on program progress and outcomes.

## ACHIEVEMENTS

- Successfully implemented a telehealth initiative that increased healthcare access for 10,000 individuals.
- Recognized for outstanding leadership in health innovation in 2023.
- Secured funding for a health project that expanded services to five new communities.
