ACHIEVEMENTS

- Improved user satisfaction scores by 20% after implementing SSO.
- Achieved full compliance with regulatory audits for two consecutive years.
- Recognized as Employee of the Month for outstanding performance in IAM.

PROFILE

Results-oriented Identity and Access Management Engineer with over 5 years of experience in the financial services industry. I specialize in implementing secure access solutions that protect sensitive financial data and ensure compliance with stringent regulations. My background includes hands-on experience with various IAM technologies and practices, including single sign-on (SSO) and role-based access control (RBAC).

EXPERIENCE

IAM CONSULTANT

Finance Secure Group

2016 - Present

- Implemented SSO solutions that simplified user access while enhancing security.
- Developed RBAC policies to control access to sensitive financial applications.
- Conducted IAM training sessions for employees to raise security awareness.
- Collaborated with auditors to ensure compliance with financial regulations.
- Monitored access patterns to identify and address anomalies.
- Led a project that reduced account provisioning time by 25%.

ACCESS CONTROL SPECIALIST

Global Bank

2014 - 2016

- Managed user access requests and maintained access control lists.
- Assisted in the deployment of multi-factor authentication for critical systems.
- Reviewed and updated access permissions regularly to ensure compliance.
- Provided technical support for IAM-related queries from users.
- Engaged in continuous monitoring of user access to detect suspicious activity.
- Documented IAM processes and contributed to policy updates.
