WORK EXPERIENCE

Senior Automation Specialist

2020-2023

Advanced Manufacturing Solutions

- Designed advanced automation systems to optimize production workflows.
- Conducted feasibility studies to assess system improvements.
- Managed the implementation of automation projects within budget and timeline.
- Trained staff on operation and maintenance of new automation technologies.
- Developed and maintained comprehensive documentation for automation systems.
- Collaborated with quality assurance teams to ensure compliance with standards.

Automation Engineer

2019-2020

Manufacturing Innovations Co

- Worked on the design and programming of PLC systems for production lines.
- Assisted in the troubleshooting of automation systems to minimize downtime.
- Participated in project planning and resource allocation discussions.
- Supported the development of training materials for automation technologies.
- Documented changes and updates to system designs and processes.
- Evaluated system performance and recommended enhancements.

ACHIEVEMENTS

- Increased production efficiency by 18% through successful automation initiatives.
- Received employee of the month for exceptional project delivery in automation.
- Developed a best practices guide for automation implementation that is now used company-wide.
