

MICHAEL ANDERSON

Operations Consultant

Strategic Industrial Engineering Consultant with a solid background in operations management and process re-engineering. With over 14 years of experience in diverse industries such as aerospace and defense, I have a proven ability to lead complex projects that enhance operational performance and ensure compliance with industry regulations. My expertise in process mapping and value stream analysis allows me to identify inefficiencies and implement effective solutions that drive continuous improvement.

WORK EXPERIENCE

Operations Consultant 2020-2023

AeroTech Solutions

- Developed and implemented operational strategies that improved production efficiency by 35%.
- Conducted process mapping sessions to identify areas for re-engineering.
- Collaborated with engineering teams to ensure compliance with aerospace standards.
- Facilitated change management initiatives to support operational transitions.
- Utilized data analysis tools to monitor performance metrics and drive improvements.
- Presented project updates to senior leadership, securing funding for future initiatives.

Industrial Engineer 2019-2020

Defense Manufacturing Corp.

- Analyzed production processes to identify inefficiencies and recommend improvements.
- Implemented process re-engineering projects that reduced cycle times by 20%.
- Collaborated with quality teams to ensure compliance with regulatory requirements.
- Trained staff on process improvement methodologies and best practices.
- Monitored project outcomes and adjusted strategies for sustainability.
- Developed reports to track progress and present findings to management.

ACHIEVEMENTS

- Achieved a reduction in operational costs by \$300K through process improvements and efficiency gains.
- Recognized for excellence in project management at the annual industry awards.
- Successfully led a team that received the 'Best Practices Award' for innovative operational strategies.
