# Michael Anderson

## APPLICATION SECURITY ENGINEER

Experienced Information Security Engineer with a focus on application security and secure software development practices. Over 6 years in the tech industry, I have built a solid foundation in security best practices and threat modeling. My background includes working closely with development teams to integrate security into the software development lifecycle (SDLC).

## EXPERIENCE

### APPLICATION SECURITY ENGINEER

Innovative Software Solutions

2016 - Present

- Collaborated with developers to integrate security into the SDLC.
- Conducted security assessments on applications to identify vulnerabilities.
- Designed and implemented security testing protocols for new software releases.
- Provided secure coding training for development teams.
- Reviewed code for security issues and provided actionable feedback.
- Monitored application security incidents and reported findings to management.

### SECURITY CONSULTANT

CyberSafe Consulting

2014 - 2016

- Assessed client applications for security vulnerabilities and risk exposure.
- Developed tailored security solutions to meet client needs.
- Conducted training sessions on secure software development practices.
- Provided ongoing support for application security enhancements.
- Authored security assessment reports for client review.
- Collaborated with project teams to address security concerns during development.
