Analytical Infrastructure as Code Engineer with 9 years of experience in cloud architecture and automation. Proficient in utilizing Terraform, AWS, and Docker to build and manage scalable infrastructure solutions. Strong background in both DevOps and agile methodologies, enabling seamless collaboration across teams. Committed to driving efficiency through process optimization and automation.

WORK EXPERIENCE

Infrastructure Architect | Dynamic Systems Group   Jan 2022 – Present

- Designed and implemented multi-cloud strategies using Terraform to enhance flexibility.
- Automated infrastructure provisioning, reducing time to market by 40%.
- Collaborated with cross-functional teams to integrate monitoring and alerting systems.
- Conducted performance assessments and implemented enhancements, improving system efficiency.
- Led initiatives to establish best practices in infrastructure management.
- Provided mentorship to junior engineers in cloud technologies.

Cloud Operations Specialist | Tech Innovations Corp   Jul 2019 – Dec 2021

- Managed and optimized cloud infrastructure using AWS and Terraform.
- Implemented CI/CD practices to streamline deployment processes.
- Monitored system performance and made recommendations for improvements.
- Documented infrastructure changes and maintained compliance standards.
- Participated in disaster recovery planning and testing.
- Conducted regular training sessions on cloud best practices for team members.

SKILLS

Terraform   AWS   Docker   CI/CD   Ansible   Python   Bash

EDUCATION

Master of Science in Cloud Computing   2013
University of Science

ACHIEVEMENTS

- Increased system uptime to 99.99% through effective infrastructure management.
- Awarded Employee of the Year for significant contributions to cloud initiatives.
- Successfully led a project that resulted in a 50% reduction in operational costs.
