Master of Science in Aquaculture Engineering

Tech University

2016-2020

SKILLS

- Aquaculture technology
- Data analytics
- Environmental assessments
- System design
- Team collaboration
- Community engagement

LANGUAGES

- English
- Spanish
- French

A highly skilled inland aquaculture specialist with a focus on integrating technology into aquaculture practices to enhance productivity and sustainability. With a background in environmental science and aquaculture engineering, the individual has successfully spearheaded initiatives that leverage data analytics and automation to optimize fish farming operations. Demonstrated expertise in designing and implementing modern aquaculture systems that adhere to best practices and environmental regulations.

WORK EXPERIENCE

Aquaculture Technology Specialist
2020-2023

Innovative Aquaculture Solutions

- Developed automated systems for monitoring fish health.
- Implemented data analytics solutions to enhance production.
- Collaborated with engineers on system design improvements.
- Trained staff on new technologies and practices.
- Monitored compliance with environmental standards.
- Presented technological advancements at industry conferences.

Environmental Aquaculture Consultant
2019-2020

EcoFish Consultants

- Assisted clients in developing sustainable aquaculture operations.
- Conducted environmental impact assessments for projects.
- Provided recommendations for compliance with regulations.
- Engaged with stakeholders to promote sustainable practices.
- Facilitated workshops on technology integration.
- Supported grant applications for research funding.

ACHIEVEMENTS

- Increased production efficiency by 35% through technology integration.
- Awarded Best Innovation in Aquaculture in 2023.
- Published multiple articles on technology in aquaculture.
