WORK EXPERIENCE

Agroecology Program Manager 2020-2023

AgroEco Innovations

- Designed and implemented agroecological training programs for diverse farming communities.
- Conducted soil assessments and developed tailored management plans.
- Collaborated with research institutions to validate sustainable practices.
- Facilitated participatory workshops to engage farmers in program design.
- Monitored and evaluated the impact of agroecological practices on yields.
- Provided ongoing support to farmers in implementing new techniques.

Research Associate in Sustainable Agriculture 2019-2020

Farm Research Institute

- Conducted research on crop rotation and its effects on soil health.
- Developed educational materials based on research findings.
- Engaged with farmers to gather insights for improved practices.
- Organized field days to demonstrate research outcomes to the farming community.
- Collaborated with interdisciplinary teams to enhance research initiatives.
- Published research results in leading agricultural journals.

ACHIEVEMENTS

- Increased adoption of sustainable practices among farmers by 45% within three years.
- Recipient of the Agroecology Innovation Award in 2022.
- Published multiple articles in peer-reviewed journals on agroecological practices.
