University of Education
2016

SKILLS

- ETL Tools
- Data Mapping
- Compliance
- Agile
- Documentation
- User Training

LANGUAGES

- English
- Spanish
- French

I am an Integration Developer with a focus on developing solutions that bridge the gap between legacy systems and modern applications. With 5 years of experience, I have worked in various sectors, including government and education, where I have implemented integration strategies that improve data accessibility and operational efficiency. My ability to analyze existing systems and design solutions that meet current and future needs has been key to my success.

WORK EXPERIENCE

Integration Developer   2020-2023

Government Tech Solutions

- Developed integration solutions for government databases, improving data retrieval times by 30%.
- Worked with stakeholders to gather requirements and ensure compliance with government regulations.
- Utilized ETL tools for data migration and transformation, enhancing data quality.
- Documented integration architectures to facilitate knowledge sharing among team members.
- Participated in Agile ceremonies, contributing to project planning and execution.
- Conducted user training sessions to promote effective use of new integrations.

Integration Analyst   2019-2020

Educational Systems Corp.

- Supported the development of integration solutions for educational software applications.
- Assisted in data mapping and transformation tasks to ensure seamless integration.
- Engaged in troubleshooting integration issues, providing timely resolutions.
- Created documentation for integration processes, aiding in knowledge retention.
- Participated in meetings with stakeholders to discuss integration progress and challenges.
- Contributed to the design of user-friendly interfaces for integration tools.

ACHIEVEMENTS

- Successfully improved data accessibility for government agencies, enhancing operational workflows.
- Received commendation for outstanding support during a major integration project.
- Implemented a new data validation process that reduced errors by 25%.
