MICHAEL ANDERSON

APPLICATION SECURITY ENGINEER

Proficient IT Security Engineer with 5 years of experience in the tech industry, focusing on application security and vulnerability management. I possess a deep understanding of software development life cycles and how security integrates into each phase. My hands-on experience includes conducting code reviews, implementing security testing tools, and collaborating with development teams to ensure secure coding practices.

PROFESSIONAL EXPERIENCE

CodeSecure Inc.

Mar 2018 - Present

Application Security Engineer

- Conducted security assessments on web applications, identifying vulnerabilities and ensuring timely remediation.
- Developed and maintained security testing protocols that improved code quality by 25%.
- Collaborated with developers to implement security best practices during application development.
- Utilized tools like OWASP ZAP and Fortify for security scanning and remediation.
- Provided training sessions for developers on secure coding techniques.
- Created detailed reports for management on security findings and remediation progress.

SafeNet Solutions

Dec 2015 - Jan 2018

Security Consultant

- Assisted clients in identifying security weaknesses in their applications and infrastructure.
- Performed code reviews and security testing on various software projects.
- Advised on compliance with security frameworks such as NIST and OWASP.
- Implemented security measures that improved client systems' resilience to attacks.
- Conducted workshops that raised awareness of security issues among stakeholders.
- Created security documentation that outlined best practices and security policies.

ACHIEVEMENTS

- Played a key role in reducing security incidents by 45% through proactive measures.
- Developed a security training program that led to a 60% increase in developer security awareness.
- Recognized for outstanding contributions to client security assessments, receiving positive feedback from multiple clients.
