Accomplished Land Information Systems Manager with a deep understanding of land administration and information systems management. Expertise in developing and implementing data-driven strategies that enhance land resource management and environmental stewardship. Proven track record of optimizing GIS technologies to streamline workflows and improve data accuracy. Strong leadership abilities demonstrated through successful project execution and team development.

PROFESSIONAL EXPERIENCE

City of Springfield   *Mar 2018 - Present*
Land Information Systems Manager

- Managed the city's land information systems to support urban planning initiatives.
- Developed and maintained a centralized GIS database for land records.
- Collaborated with city planners to enhance land use efficiency.
- Implemented data quality assurance processes to improve land data integrity.
- Facilitated community engagement sessions to gather public input on land use.
- Prepared reports for city council on land management strategies.

Land Surveying Associates   *Dec 2015 - Jan 2018*
GIS Technician

- Assisted in the creation of topographical maps for land development projects.
- Conducted field surveys to gather spatial data for GIS integration.
- Utilized CAD software to produce accurate land survey drawings.
- Supported senior analysts in data analysis and reporting tasks.
- Maintained GIS databases, ensuring up-to-date information.
- Participated in project meetings to discuss survey findings and recommendations.

ACHIEVEMENTS

- Successfully implemented a GIS system that improved land record accuracy by 25%.
- Recognized for exemplary project management in the city's land use planning initiative.
- Trained over 20 staff members in GIS applications and data management.
