EXPERTISE SKILLS

- geospatial analysis
- GIS software
- project management
- data validation
- technical guidance
- client engagement

LANGUAGES

- English
- Spanish
- French

CERTIFICATION

- Bachelor of Science in Geomatics, University of Alberta

MICHAEL ANDERSON

GEOSPATIAL ANALYST

Proficient Land Survey Administration Officer with a robust background in geospatial data analysis and technological integration within the surveying sector. Demonstrates a strong command of contemporary surveying tools and software, enabling the delivery of precise and actionable data for various engineering and construction projects. Possesses a unique blend of technical expertise and project management acumen, facilitating seamless collaboration between survey teams and engineering departments.

PROFESSIONAL EXPERIENCE

TechSurvey Innovations

Mar 2018 - Present

Geospatial Analyst

- Analyzed geospatial data to inform project planning and decision-making for infrastructure development.
- Utilized advanced GIS software to create detailed maps and visual representations of survey data.
- Collaborated with engineering teams to integrate survey findings into project designs.
- Conducted data validation and quality assurance checks to maintain high standards.
- Provided technical guidance on geospatial tools and methodologies to project teams.
- Presented findings to stakeholders and clients, enhancing project transparency.

Urban Survey Group

Dec 2015 - Jan 2018

Land Survey Intern

- Assisted in field surveys using total stations and GPS equipment for data collection.
- Supported the preparation of survey reports and documentation for client review.
- Participated in site evaluations and assessments to gather relevant information.
- Engaged in the calibration and maintenance of surveying instruments.
- Collaborated with senior surveyors to learn best practices and techniques.
- Contributed to the development of project schedules and timelines.

ACHIEVEMENTS

- Developed a new data analysis framework that improved project turnaround time by 25%.
- Recognized for excellence in technical presentation at the National Geospatial Conference.
- Contributed to a project that received the 'Innovation in Surveying' award.
