- French

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY, TECH UNIVERSITY, 2015

ACHIEVEMENTS

- Reduced operational costs by 30% through effective use of virtualization technologies.
- Recognized for outstanding contributions to system performance enhancements.
- Successfully led a project to implement cloud solutions, resulting in improved scalability.

WORK EXPERIENCE

LINUX SYSTEMS ENGINEER
NextGen Technologies
2020 - 2025

- Oversaw Linux server environments, enhancing performance and stability for critical applications.
- Implemented virtualization solutions using VMware, significantly reducing hardware costs.
- Developed automated scripts for system maintenance tasks, resulting in a 50% reduction in manual efforts.
- Collaborated with developers on continuous integration and deployment strategies.
- Maintained comprehensive documentation for system configurations and processes.
- Conducted training sessions for junior staff on Linux best practices and tools.

LINUX SYSTEMS ADMINISTRATOR
Data Solutions Group
2015 - 2020

- Managed Linux server infrastructure, ensuring consistent performance and reliability.
- Executed system upgrades and maintained compliance with security policies.
- Developed and implemented disaster recovery plans, safeguarding critical systems.
- Utilized monitoring tools to analyze server performance and troubleshoot issues.
- Provided technical support to end-users, resolving issues efficiently.
- Contributed to the team's knowledge base by documenting troubleshooting procedures.
