Detail-oriented Low Voltage Engineer with 6 years of experience in the residential sector, specializing in home automation and smart home technologies. I have a passion for integrating technology to improve comfort, convenience, and security in homes. My technical expertise includes designing and installing low voltage systems that control lighting, HVAC, security, and entertainment systems.

WORK EXPERIENCE

Home Automation Engineer | SmartHome Innovations

Jan 2022 – Present

- Designed and installed low voltage systems for home automation and control.
- Collaborated with homeowners to create customized smart home solutions.
- Performed system testing and troubleshooting to ensure optimal performance.
- Utilized advanced technology to create seamless integrations across various systems.
- Provided ongoing support and maintenance for installed systems.
- Achieved a 97% customer satisfaction rate through effective communication and service.

Low Voltage Technician | HomeTech Solutions

Jul 2019 – Dec 2021

- Installed low voltage systems for security and home entertainment.
- Assisted clients with troubleshooting and repairs on existing systems.
- Documented all installations and provided clients with user manuals.
- Worked with various vendors to source high-quality materials.
- Maintained a clean and organized work environment on job sites.
- Implemented a feedback system to enhance service quality for future clients.
