- Received 'Rising Star Award' for exceptional performance in process analysis.

# Michael Anderson

## FOOD PROCESS ANALYST

Dedicated Manufacturing Process Analyst with a focus on food and beverage production, bringing over 5 years of experience in optimizing manufacturing processes for quality and safety. Expertise in food safety regulations and Lean principles, ensuring compliance and efficiency in high-volume production environments. Proven ability to conduct thorough process audits and implement improvements that enhance product quality and reduce waste.

## EXPERIENCE

### FOOD PROCESS ANALYST

FreshBite Foods

2016 - Present

- Analyzed production workflows to optimize efficiency, leading to a 15% increase in output.
- Implemented food safety protocols that resulted in zero compliance issues during inspections.
- Conducted training on Lean practices, enhancing team understanding and application.
- Collaborated with quality assurance teams to ensure product consistency and safety.
- Monitored production metrics, identifying trends for continuous improvement.
- Developed and maintained documentation for process improvements and best practices.

### PROCESS IMPROVEMENT INTERN

NutriCorp

2014 - 2016

- Assisted in the evaluation of manufacturing processes for compliance with food safety standards.
- Gathered data to support process improvement initiatives aimed at reducing waste.
- Participated in team meetings to provide insights on production challenges.
- Supported the development of training materials focused on quality control.
- Conducted time studies to identify inefficiencies in production lines.
- Prepared reports on process improvements for management review.
