SKILLS

- Production Scheduling
- Data Analysis
- Team Leadership
- Process Improvement
- ERP Systems
- Communication

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING, MASSACHUSETTS INSTITUTE OF TECHNOLOGY, 2011

ACHIEVEMENTS

- Achieved a 35% reduction in production costs through effective scheduling and resource management.
- Received the 'Best Team Player' award for outstanding collaboration across departments.
- Implemented a scheduling system that led to a 40% increase in production capacity.

PROFILE

Results-oriented Manufacturing Scheduling Engineer with 10 years of experience in high-volume consumer electronics manufacturing. Expertise in developing and optimizing production schedules to maximize efficiency while minimizing costs. Proficient in using advanced scheduling tools and methodologies to forecast production needs based on sales trends and inventory levels. Strong analytical skills allow for effective data-driven decision-making, resulting in significant operational improvements.

EXPERIENCE

SENIOR SCHEDULING ENGINEER

TechGadgets Corp.

2016 - Present

- Led the scheduling department in optimizing production processes, achieving a 35% reduction in waste.
- Implemented a new scheduling software that improved production planning accuracy by 40%.
- Collaborated with engineering teams to align product development timelines with production capabilities.
- Conducted root cause analysis on scheduling discrepancies and developed corrective actions.
- Managed a team of 5 schedulers, providing training and performance feedback.
- Developed key performance indicators to measure scheduling effectiveness and drive continuous improvement.

MANUFACTURING SCHEDULER

ElectroManufacture Inc.

2014 - 2016

- Created and maintained production schedules for multiple product lines, ensuring timely fulfillment of orders.
- Utilized data analytics to forecast production needs, resulting in a 25% improvement in on-time delivery.
- Coordinated with quality assurance teams to ensure all products met industry standards.
- Streamlined communication processes between production and logistics to enhance efficiency.
- Analyzed inventory levels to optimize stock management and reduce excess inventory by 20%.
- Participated in weekly production meetings to align schedules with operational goals.
