## SKILLS

- NDT Methods
- Quality Assurance
- Safety Compliance
- Inspection Techniques
- Problem Solving
- Team Collaboration

## EDUCATION

**BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING, STATE TECHNICAL UNIVERSITY**

## LANGUAGE

- English
- Spanish
- German

## ACHIEVEMENTS

- Improved NDT process efficiency by 25% through the implementation of new technologies.
- Recognized for outstanding performance in quality management during annual evaluations.
- Contributed to achieving zero safety incidents during inspection activities over a 12-month period.

# Michael Anderson

## NDT MECHANICAL INSPECTOR

Dynamic Mechanical Inspection Technician with specialized expertise in the oil and gas industry, leveraging over 8 years of experience in inspection and quality assurance of mechanical components. Highly proficient in the use of advanced non-destructive testing (NDT) methods to assess the integrity and reliability of critical equipment and systems. Possesses a solid understanding of industry regulations and standards, ensuring compliance throughout all inspection processes.

## EXPERIENCE

### NDT MECHANICAL INSPECTOR

Energy Solutions Group

2016 - Present

- Performed non-destructive testing on mechanical components to ensure compliance with industry standards.
- Utilized ultrasonic testing and magnetic particle inspection techniques for defect detection.
- Collaborated with engineering teams to address quality issues and implement solutions.
- Documented inspection results and generated comprehensive reports for management.
- Participated in safety audits and inspections to uphold compliance.
- Trained staff on NDT procedures and best practices.

### MECHANICAL QUALITY INSPECTOR

PetroTech Services

2014 - 2016

- Conducted inspections of mechanical components and systems in compliance with safety regulations.
- Utilized precision measurement tools to verify dimensions and tolerances.
- Engaged in root cause analysis and implemented corrective actions for defects.
- Maintained inspection records and documentation for audit purposes.
- Coordinated with production teams to facilitate timely inspections.
- Assisted in the development of quality assurance policies and procedures.
