SKILLS

- Wearable Technology
- Product Design
- User Testing
- Compliance Management
- PCB Design
- Stakeholder Engagement

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN BIOMEDICAL ENGINEERING, HEALTH UNIVERSITY, 2016

ACHIEVEMENTS

- Successfully launched a wearable device that increased patient engagement by 50%.
- Recognized for innovation in design at the National Health Tech Awards.
- Contributed to a project that won a grant for developing next-gen health tech solutions.

WORK EXPERIENCE

PRODUCT DEVELOPMENT ENGINEER

Wearable Health Tech Inc.

2020 - 2025

- Designed and developed a smartwatch for continuous health monitoring.
- Conducted user testing to gather feedback for product improvements.
- Collaborated with marketing teams to define product specifications.
- Managed timelines and coordinated with suppliers for component sourcing.
- Ensured compliance with health regulations throughout the product lifecycle.
- Presented product updates to stakeholders and investors regularly.

JUNIOR ELECTRONICS ENGINEER

Smart Medical Devices

2015 - 2020

- Assisted in the development of a wearable ECG monitor.
- Worked on circuit design and PCB layout for medical devices.
- Participated in testing and validation processes for new products.
- Documented design processes and maintained accurate records.
- Provided support during the manufacturing phase to ensure product quality.
- Engaged in brainstorming sessions to propose new product ideas.
