- michael.anderson@email.com

As a Medical Epidemiologist with a specialized focus on health economics, I have spent over 11 years examining the cost-effectiveness of public health interventions. My work involves the integration of economic principles with epidemiological methods to evaluate health programs. I have collaborated with government agencies and NGOs to conduct economic evaluations that inform resource allocation decisions.

## WORK EXPERIENCE

### Health Economist | World Bank

Jan 2022 – Present

- Conducted economic evaluations of health interventions in low- and middle-income countries.
- Developed models to assess the cost-effectiveness of vaccination programs.
- Collaborated with epidemiologists to integrate economic analysis into health research.
- Prepared reports and presentations for stakeholders on health economics findings.
- Facilitated workshops to educate policymakers on economic evaluation methods.
- Published articles on health economics in peer-reviewed journals.

### Senior Epidemiologist | International Health Organization

Jul 2019 – Dec 2021

- Led studies on the economic impact of infectious diseases on healthcare systems.
- Developed strategies to optimize health resource allocation based on epidemiological data.
- Collaborated with governments to assess the cost-effectiveness of health policies.
- Analyzed data to inform decisions regarding health program funding.
- Engaged with stakeholders to discuss findings and recommendations.
- Published research on the intersection of health economics and epidemiology.
