## 💼 WORK EXPERIENCE

**Medical Research Analyst**                               2020-2023

NextGen Health Research

- Managed data collection processes for multiple clinical trials, ensuring accuracy and compliance.
- Analyzed patient data to identify trends and inform clinical decision-making.
- Collaborated with biostatisticians to refine research methodologies.
- Developed reports and presentations for stakeholders, summarizing key findings.
- Participated in the implementation of a new data management system that improved efficiency.
- Engaged with patients to gather qualitative data for research projects.

**Research Associate**                               2019-2020

Clinical Trial Solutions

- Assisted in the design and execution of clinical research protocols.
- Conducted literature reviews to support project development.
- Maintained accurate records of research activities and findings.
- Supported the preparation of research reports and grant applications.
- Participated in team discussions to address project challenges and solutions.
- Ensured compliance with ethical standards throughout the research process.

## ⭐ ACHIEVEMENTS

- Contributed to a published study that improved clinical practices in patient care.
- Developed a data management tool that reduced processing time by 20%.
- Recognized for exceptional teamwork and contributions to research projects.
