

MICHAEL ANDERSON

MEDICAL RESEARCH ETHICS SPECIALIST

PROFILE

With over 15 years of experience in clinical research ethics, I have developed a profound understanding of the ethical landscape that governs medical research. My journey began as a research assistant, where I quickly recognized the importance of protecting participants' rights and well-being.

EXPERIENCE

MEDICAL RESEARCH ETHICS SPECIALIST

Health Research Division

2016 - Present

- Oversaw the ethical review process for over 200 research projects annually, ensuring regulatory compliance.
- Provided strategic guidance on ethical issues, enhancing research quality and participant safety.
- Conducted workshops on ethical research practices, resulting in a 30% increase in staff compliance.
- Engaged with community stakeholders to address ethical concerns, building trust and transparency.
- Reviewed and revised informed consent documents, improving clarity and participant understanding.
- Collaborated with legal teams to ensure alignment with emerging ethical regulations.

CLINICAL RESEARCH COORDINATOR

University Medical Center

2014 - 2016

- Coordinated multi-site clinical trials, ensuring adherence to ethical standards and protocols.
- Monitored research activities for compliance with ethical guidelines, resulting in zero violations.
- Educated research teams on ethical considerations, fostering a culture of integrity.
- Developed and maintained relationships with regulatory bodies, facilitating smooth approvals.
- Analyzed data from ethical audits to identify trends and areas for improvement.
- Assisted in the preparation of ethics submissions for grant proposals, enhancing funding success.
