EDUCATION

MASTER'S IN PUBLIC HEALTH, STATE UNIVERSITY

ACHIEVEMENTS

- Led a research project that resulted in a 20% increase in vaccination rates in targeted communities.
- Received the 'Emerging Leader in Public Health' award from the State Health Department in 2021.
- Published research on health disparities in a leading public health journal.

PROFILE

Results-driven Medical Research Fellow with a strong background in epidemiology and public health. Over 5 years of experience conducting research aimed at understanding disease patterns and improving community health outcomes. Proficient in statistical software and data visualization tools, with a keen ability to analyze large datasets and interpret results for public health policies.

EXPERIENCE

EPIDEMIOLOGIST

Global Health Initiative

2016 - Present

- Designed and executed epidemiological studies on infectious diseases in underserved populations.
- Analyzed data using R and Tableau to identify health trends and risk factors.
- Collaborated with local health departments to disseminate findings and influence policy change.
- Conducted workshops to train health professionals on data collection and interpretation.
- Published research findings in peer-reviewed journals to enhance public health knowledge.
- Participated in grant writing, securing funding for ongoing research projects.

RESEARCH ASSISTANT

University Public Health Center

2014 - 2016

- Assisted in the analysis of longitudinal health data to assess community health interventions.
- Conducted surveys and focus groups to gather qualitative data from community members.
- Supported the development of educational materials for public health campaigns.
- Maintained databases and ensured data integrity for research projects.
- Presented research findings at local health fairs and community meetings.
- Collaborated with faculty on research proposals and grant submissions.
