Strategic Medical Research Policy Analyst with over 9 years of experience in health systems strengthening and policy reform. Expertise in analyzing healthcare delivery systems and developing strategic policies that enhance service delivery and patient outcomes. Proven track record in stakeholder engagement and collaborative policy development across multiple sectors. Skilled in using data analytics tools to assess policy impacts and inform decision-making.

💼 WORK EXPERIENCE

Health Systems Policy Analyst
2020-2023

National Institute for Health Policy

- Led initiatives to evaluate health system performance and recommend policy improvements based on data analysis.
- Collaborated with government agencies to develop strategic plans for healthcare reform and service delivery.
- Utilized data analytics tools to assess the impact of policy changes on healthcare access and quality.
- Facilitated stakeholder workshops to gather input on proposed health policies and foster collaboration.
- Authored reports that influenced national health policy discussions and decisions.
- Mentored junior analysts, cultivating a team-oriented approach to policy analysis.

Policy Advisor
2019-2020

Global Health Strategies

- Provided strategic policy recommendations to enhance healthcare access and outcomes in low-resource settings.
- Engaged with international organizations to align health policies with global health goals.
- Conducted policy analyses to assess the effectiveness of healthcare interventions and programs.
- Supported the development of training programs for healthcare policymakers and practitioners.
- Coordinated multi-stakeholder dialogues to foster collaboration in health policy development.
- Presented policy research findings at international conferences, promoting knowledge exchange.

★ ACHIEVEMENTS

- Instrumental in developing a national health policy framework adopted by multiple states.
- Recognized with the 'Outstanding Policy Analyst' award for contributions to healthcare reform in 2020.
- Increased stakeholder engagement in health policy discussions by 45% through
