- Recognized for excellence in research communication, receiving awards from professional organizations.

Michael Anderson

HEALTH ECONOMICS ANALYST

Strategic Medical Research Program Specialist with 9 years of experience in health economics and outcomes research. Expertise in evaluating the economic impact of healthcare interventions and developing research methodologies that drive significant cost savings. Proven ability to collaborate with cross-functional teams including epidemiologists, biostatisticians, and healthcare practitioners. Strong analytical skills and proficiency in economic modeling software.

EXPERIENCE

HEALTH ECONOMICS ANALYST

Health Outcomes Research Institute

2016 - Present

- Conducted economic evaluations of healthcare interventions, leading to a 20% reduction in costs for implemented programs.
- Developed comprehensive reports that influenced policy decisions at state and national levels.
- Collaborated with clinical teams to design studies that assess the value of new therapies.
- Utilized software such as TreeAge Pro for modeling and data analysis.
- Presented findings to stakeholders, enhancing understanding of economic impacts.
- Led workshops to train research staff on health economics methodologies.

RESEARCH ASSOCIATE

Epidemiology and Health Services Research Center

2014 - 2016

- Assisted in the design and execution of studies assessing healthcare costs and quality of life.
- Managed data collection and analysis using Stata, ensuring data integrity.
- Contributed to grant applications that secured funding for innovative health economics projects.
- Collaborated with policy-makers to translate research findings into actionable recommendations.
- Facilitated discussions between researchers and healthcare providers to align research goals.
- Presented research outcomes at conferences, enhancing institutional visibility.
