WORK EXPERIENCE

Global Health Research Coordinator

2020-2023

International Health Collaborative

- Coordinated multi-country research projects aimed at improving maternal and child health outcomes.
- Developed culturally appropriate survey instruments for data collection in diverse settings.
- Managed relationships with local health officials to facilitate research implementation.
- Utilized SPSS for data analysis and interpretation of health outcomes.
- Organized training for local researchers on ethical research practices.
- Presented findings to international stakeholders, influencing global health policies.

Research Assistant

2019-2020

Global Health Institute

- Assisted in data collection and analysis for global health studies focused on infectious diseases.
- Conducted literature reviews to support research projects and grant applications.
- Maintained research databases, ensuring accuracy and consistency of data.
- Facilitated communication between research teams and local communities.
- Supported the preparation of research reports and presentations for stakeholders.
- Engaged with community members to understand local health challenges.

ACHIEVEMENTS

- Led a study that identified key barriers to healthcare access in rural communities.
- Published findings in international journals, raising awareness of health disparities.
- Received the 'Global Health Impact' award for contributions to maternal health initiatives.
