- San Francisco, CA

SKILLS

- MuleSoft
- IBM Integration Bus
- RESTful APIs
- Data Transformation
- Cloud Integration
- Agile Methodologies

LANGUAGES

- English
- Spanish
- French

EDUCATION

**BACHELOR OF SCIENCE IN
INFORMATION TECHNOLOGY, TECH
UNIVERSITY**

ACHIEVEMENTS

- Received 'Employee of the Month' for outstanding contributions to middleware projects and client satisfaction.
- Successfully delivered a key integration project ahead of schedule, resulting in a 25% increase in client retention.
- Recognized for implementing a cost-effective middleware solution that saved the company \$50,000 annually.

PROFILE

Results-driven Middleware Developer with over 5 years of experience in integrating enterprise applications and services. Expertise in using middleware technologies such as MuleSoft and IBM Integration Bus to streamline business processes and enhance system connectivity. Strong analytical and problem-solving skills, with a focus on delivering high-quality solutions that meet client requirements.

EXPERIENCE

MIDDLEWARE DEVELOPER

Innovative Tech Solutions

2016 - Present

- Developed and maintained middleware solutions using MuleSoft, enhancing data exchange between cloud and on-premise applications.
- Designed efficient integration workflows that reduced processing time by 35% for critical business processes.
- Collaborated with QA teams to define testing strategies for middleware applications, ensuring high-quality deliverables.
- Conducted performance tuning of middleware applications, achieving a 20% improvement in transaction speeds.
- Worked closely with business analysts to gather functional requirements and translate them into technical specifications.
- Provided technical support and troubleshooting for middleware issues, improving system reliability and customer satisfaction.

INTEGRATION ENGINEER

Business Connectors Inc.

2014 - 2016

- Implemented middleware solutions using IBM Integration Bus to facilitate integration between various enterprise systems.
- Developed custom adapters and connectors to enhance system interoperability and data exchange.
- Participated in the design and implementation of RESTful APIs for external partners, improving data accessibility.
- Optimized data transformation processes, resulting in a 15% reduction in data processing costs.
- Conducted workshops for clients on middleware best practices and integration strategies.
- Assisted in the migration of legacy systems to modern middleware platforms, improving system performance and scalability.
