Michael
ANDERSON

MIDDLEWARE DEVELOPER

Innovative Middleware Developer with 4 years of experience in developing and maintaining middleware applications that facilitate seamless integration between complex systems. Expertise in using technologies such as Red Hat Fuse and Apache Kafka to create efficient data pipelines and real-time data processing solutions. Strong problem-solving abilities and a passion for leveraging technology to drive business success.

SKILLS

- Red Hat Fuse
- Apache Kafka
- REST APIs
- Data Integration
- Agile Development
- Middleware Testing

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING, TECH INSTITUTE

ACHIEVEMENTS

- Successfully delivered a middleware project that improved data processing times by 25%.
- Recognized for outstanding performance in team contributions during high-pressure projects.
- Awarded 'Rising Star' for innovative solutions that enhanced application interoperability.

WORK EXPERIENCE

MIDDLEWARE DEVELOPER
NextGen Technologies

2020 - 2025

- Developed middleware applications using Red Hat Fuse, improving data integration processes by 35%.
- Implemented real-time data processing solutions using Apache Kafka, enhancing system responsiveness.
- Collaborated with data engineering teams to design data pipelines that support analytics initiatives.
- Participated in Agile development processes, ensuring timely delivery of middleware projects.
- Conducted unit testing and integration testing for middleware applications, ensuring high quality and performance.
- Provided technical documentation and support for middleware solutions, improving knowledge sharing across teams.

JUNIOR MIDDLEWARE DEVELOPER
Digital Solutions Corp.

2015 - 2020

- Assisted in the development of middleware applications that integrated various systems using REST APIs.
- Supported the maintenance and enhancement of existing middleware services, improving functionality and performance.
- Participated in code reviews to ensure adherence to best practices and coding standards.
- Documented middleware processes and workflows, contributing to project transparency.
- Engaged in troubleshooting efforts to resolve middleware-related issues promptly.
- Contributed to team meetings and discussions, providing insights on potential improvements.
