WORK EXPERIENCE

Senior Middleware Architect

2020-2023

Global Enterprises

- Architected a messaging solution using WebSphere MQ that streamlined communication between multiple business units, resulting in a 50% reduction in message delivery times.
- Led a team in the implementation of security protocols for middleware applications, ensuring compliance with regulatory standards.
- Conducted regular performance assessments of middleware systems, identifying areas for improvement and implementing solutions.
- Collaborated with IT and business teams to develop middleware strategies that aligned with organizational goals.
- Mentored junior developers, providing guidance on best practices and technical skills.
- Documented middleware architecture and integration processes, enhancing team understanding and onboarding for new members.

Middleware Developer

2019-2020

Innovative Solutions Co.

- Developed middleware solutions utilizing RabbitMQ for asynchronous messaging between applications.
- Worked on enhancing existing middleware applications, resulting in a 30% boost in overall application performance.
- Participated in code reviews, contributing to the establishment of coding standards and best practices.
- Assisted in the deployment of middleware applications in both on-premise and cloud environments.
- Provided technical support for middleware-related issues, ensuring minimal disruption to services.
- Engaged in knowledge-sharing sessions to promote learning and development within the team.

ACHIEVEMENTS

- Recognized for implementing a middleware solution that increased message throughput by 40%.
- Awarded 'Team Player of the Year' for outstanding collaboration across departments.
