- French

Proficient Military Cyber Operations Specialist with a robust background in network security and cyber defense. Demonstrated expertise in implementing security measures to safeguard military communications and data. Strong analytical skills complemented by hands-on experience in threat detection and incident response. Proven ability to work collaboratively in high-pressure environments, ensuring the integrity and availability of critical systems.

💼 WORK EXPERIENCE

Network Security Engineer   2020-2023
U.S. Navy

- Designed and implemented network security protocols for military communications.
- Conducted regular security audits to identify potential vulnerabilities.
- Collaborated with IT teams to ensure compliance with security standards.
- Managed firewall configurations and intrusion detection systems.
- Provided technical support during cybersecurity incidents.
- Trained personnel on network security best practices and protocols.

Cyber Operations Specialist   2019-2020
U.S. Army Cyber Command

- Executed cyber defense operations to protect military networks.
- Analyzed network traffic for indicators of compromise.
- Developed incident response plans to address cybersecurity threats.
- Coordinated training exercises to enhance team readiness.
- Documented security incidents and prepared reports for analysis.
- Participated in cybersecurity drills to test response capabilities.

★ ACHIEVEMENTS

- Received the Navy and Marine Corps Achievement Medal for outstanding service.
- Improved network security posture by 30% through proactive measures.
- Developed a comprehensive training program for new hires.
