- French

### EDUCATION

MASTER OF PUBLIC HEALTH,  
UNIVERSITY OF COMMUNITY STUDIES

### ACHIEVEMENTS

- Successfully secured funding for a community health initiative through compelling research proposals.
- Increased program participation by 40% through data-driven outreach strategies.
- Published research findings in leading public health journals, contributing to evidence-based practices.

### PROFILE

Results-driven Mixed Methods Researcher with a focus on social behavior and community health. With over 6 years of experience in conducting comprehensive research studies, I have developed a keen ability to integrate qualitative insights with quantitative data. My work spans various community initiatives, where I have effectively evaluated programs aimed at improving public health outcomes.

### EXPERIENCE

#### MIXED METHODS RESEARCHER

##### Community Health Solutions

2016 - Present

- Conducted mixed methods evaluations of community health programs, utilizing surveys and focus groups.
- Developed data collection tools that improved data quality and participant engagement.
- Analyzed data using R, providing insights that led to a 25% improvement in program effectiveness.
- Collaborated with community leaders to ensure research relevance and applicability.
- Presented findings at regional conferences, enhancing community partnerships.
- Trained staff on mixed methods research techniques and ethical considerations.

#### RESEARCH COORDINATOR

##### Public Health Institute

2014 - 2016

- Designed and implemented mixed methods studies to evaluate public health interventions.
- Managed qualitative data collection via interviews and community forums.
- Performed statistical analysis to identify key trends and outcomes.
- Drafted comprehensive reports that influenced policy changes at the local government level.
- Facilitated workshops to disseminate research findings to community stakeholders.
- Coordinated with cross-functional teams to align research with organizational goals.
