EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING, UNIVERSITY OF E-COMMERCE, 2016

ACHIEVEMENTS

- Recognized for outstanding contribution to a project that increased sales conversion rates by 25%.
- Achieved a 98% satisfaction rate from users after implementing new API features based on feedback.
- Successfully led a team that developed an API solution reducing operational costs by 15%.

Dedicated Mobile API Developer with 4 years of experience in the e-commerce sector, specializing in creating robust APIs that enhance the shopping experience for users. My background includes proficiency in PHP, Laravel, and MySQL, which I utilize to build and optimize backend services for mobile applications. I am passionate about user experience and focus on delivering high-quality APIs that facilitate seamless interactions between mobile apps and e-commerce platforms.

WORK EXPERIENCE

MOBILE API DEVELOPER
E-Commerce Innovations Inc.

2020 - 2025

- Developed APIs for mobile e-commerce applications, resulting in a 35% increase in transaction completion rates.
- Collaborated with design teams to ensure APIs met user experience standards, enhancing user retention.
- Implemented security measures to protect customer data, achieving a 100% success rate in security audits.
- Monitored API performance metrics and made data-driven improvements, reducing latency by 25%.
- Participated in sprint planning and retrospectives, driving continuous improvement in development cycles.
- Created comprehensive API documentation, facilitating easier integration for external partners.

API INTEGRATION SPECIALIST
RetailTech Systems

2015 - 2020

- Assisted in the development and integration of APIs for a mobile shopping platform, boosting user engagement by 20%.
- Worked with QA teams to ensure API functionalities met quality standards before deployment.
- Participated in agile ceremonies to enhance communication within the development team.
- Conducted performance testing and optimization, achieving a 30% reduction in API response times.
- Documented API endpoints and usage instructions, improving onboarding processes for new developers.
- Supported the migration of legacy systems to modern API architecture, enhancing scalability.
