PROFILE

Results-driven Mobile App Engineer with a focus on e-commerce applications and over 7 years of experience. Specializing in creating seamless shopping experiences that drive conversion and customer loyalty. Expertise in both front-end and back-end development, utilizing technologies like Java, Kotlin, and Swift. Committed to delivering high-quality code with a sharp eye for detail and a strong emphasis on performance optimization.

EXPERIENCE

LEAD MOBILE APPLICATION ENGINEER

E-Shop Solutions

2016 - Present

- Designed and launched an e-commerce app that increased sales by 35% within the first quarter post-launch.
- Led a team of developers in the agile development of mobile features, ensuring alignment with business objectives.
- Implemented A/B testing for key app functionalities, optimizing user interfaces based on user behavior data.
- Integrated payment gateway solutions that enhanced transaction security and efficiency.
- Analyzed user feedback and performance metrics to drive continuous improvements, reducing cart abandonment rates by 20%.
- Developed and maintained comprehensive documentation of coding processes and project workflows.

MOBILE APP DEVELOPER

RetailTech Inc.

2014 - 2016

- Contributed to the development of a shopping app that achieved 200,000 downloads within six months.
- Collaborated with marketing teams to implement promotional features that increased customer engagement by 30%.
- Utilized Firebase and Google Analytics to track app performance and user engagement metrics.
- Conducted code reviews and provided mentorship to junior developers, improving overall team productivity.
- Ensured compliance with app store guidelines, achieving successful submissions for all app updates.
- Participated in cross-functional team meetings to ensure the alignment of project goals and technical requirements.
