- German

## ACHIEVEMENTS

- Awarded 'Best Security Feature' for developing an innovative security protocol for mobile banking applications.
- Reduced application vulnerabilities by 40% through implementation of security best practices.
- Recognized for outstanding contributions to the secure development of financial applications.

## EXPERIENCE

### MOBILE SECURITY ARCHITECT

FinTech Innovations

2016 - Present

- Designed mobile application architectures that adhere to stringent security standards, reducing vulnerabilities by 50%.
- Implemented two-factor authentication in mobile apps, enhancing user security and trust.
- Worked closely with legal teams to ensure compliance with financial regulations.
- Conducted security audits on existing mobile applications, identifying and mitigating risks.
- Led training sessions on secure coding practices for development teams.
- Collaborated with product managers to define security features based on user needs.

### MOBILE APPLICATION DEVELOPER

SecureApps Inc.

2014 - 2016

- Developed mobile applications for banking and financial services with a focus on security.
- Integrated APIs for secure transactions, ensuring data integrity and user protection.
- Participated in user acceptance testing to gather feedback and improve application functionality.
- Maintained documentation for application security protocols and compliance standards.
- Collaborated with UX designers to create user-friendly interfaces that meet security requirements.
- Provided technical support for users experiencing issues with mobile applications.
