UNIVERSITY OF MICHIGAN, 2016**

### ACHIEVEMENTS

- Improved test automation coverage by 50% within the first year of implementation.
- Recognized for outstanding teamwork and collaboration in project delivery.
- Successfully identified and mitigated critical security vulnerabilities ahead of product launch.

### PROFILE

I am a highly skilled Mobile Automation Engineer with over 4 years of experience in the fintech industry, focusing on delivering secure and reliable mobile applications. My role has involved developing automated testing solutions that ensure our applications meet stringent regulatory requirements while providing a seamless user experience.

### EXPERIENCE

#### MOBILE AUTOMATION ENGINEER

##### FinTech Solutions Co.

*2016 - Present*

- Developed and maintained automated test scripts for mobile banking applications using Appium.
- Performed security testing to identify vulnerabilities, ensuring compliance with industry regulations.
- Integrated automated tests into the CI/CD pipeline, reducing deployment time by 25%.
- Collaborated with UX designers to validate user interface elements through automated tests.
- Conducted performance testing to ensure optimal app performance under load conditions.
- Documented and communicated test results to stakeholders, facilitating informed decision-making.

#### QA ENGINEER

##### Innovatech Labs

*2014 - 2016*

- Executed manual testing for mobile applications, ensuring functionality across various devices.
- Designed test cases based on requirements gathered from product teams.
- Utilized JIRA for defect tracking and reporting, improving team response time.
- Participated in daily stand-ups to provide updates on testing progress and challenges.
- Contributed to the development of testing best practices and standards.
- Supported user acceptance testing (UAT) with clients, ensuring satisfaction with final products.
