

Michael ANDERSON

MOBILE AUTOMATION TESTER

As a Mobile Automation Engineer with a keen interest in healthcare technology, I have over 5 years of experience specializing in testing mobile applications for health-related services. My role has involved developing automated test cases to ensure the reliability and security of applications that manage sensitive health information.

WORK EXPERIENCE

MOBILE AUTOMATION TESTER

HealthTech Innovations

2020 - 2025

- Developed automated test scripts for mobile health applications using Espresso and Appium.
- Ensured compliance with HIPAA regulations through rigorous testing protocols.
- Participated in cross-functional team meetings to align testing strategies with product goals.
- Conducted user acceptance testing (UAT) with healthcare professionals to validate application usability.
- Created detailed test plans and scenarios based on user requirements and regulatory standards.
- Reported and tracked defects using JIRA, ensuring timely resolution prior to deployment.

QA AUTOMATION ENGINEER

MediApps Corp.

2015 - 2020

- Executed manual and automated tests for mobile applications focused on patient management.
- Collaborated with developers to identify and resolve issues during the development process.
- Utilized TestRail for managing test cases and reporting on test results.
- Conducted performance testing to ensure application scalability and reliability.
- Assisted in the creation of testing documentation and standard operating procedures.
- Participated in agile development processes to enhance application quality.
