

MICHAEL ANDERSON

Mobile Automation Engineer

As a Mobile Automation Engineer with a focus on e-commerce, I have spent the last 3 years developing automated tests for mobile shopping applications. My experience includes collaborating with development teams to create and execute test cases that ensure a seamless user experience while meeting business requirements. I am adept at using tools like Appium and Cypress to streamline testing processes and increase efficiency.

WORK EXPERIENCE

Mobile Automation Engineer

2020-2023

E-Commerce Solutions Ltd.

- Developed and executed automated test scripts for mobile applications using Appium.
- Collaborated with UX designers to ensure test scenarios align with user expectations.
- Performed regression testing on new features to validate their functionality.
- Utilized Cypress for end-to-end testing, improving test reliability.
- Documented test cases and results to maintain a clear record of testing efforts.
- Participated in agile ceremonies to align testing efforts with development timelines.

QA Engineer

2019-2020

ShopEasy Apps

- Executed manual and automated tests for mobile e-commerce applications.
- Worked closely with developers to identify and resolve issues before deployment.
- Maintained test case documentation in TestRail for transparency and accountability.
- Conducted user acceptance testing with stakeholders to validate application usability.
- Provided feedback on testing processes to enhance overall quality.
- Assisted in training team members on mobile testing tools and methodologies.

ACHIEVEMENTS

- Increased test efficiency by 40% through automation initiatives.
- Recognized for outstanding performance in enhancing e-commerce application quality.
- Contributed to the launch of a major app update that improved user satisfaction ratings.
