## EXPERTISE SKILLS

- MySQL
- PostgreSQL
- Kubernetes
- RESTful APIs
- Redis
- Agile

## LANGUAGES

- English
- Spanish
- French

## CERTIFICATION

- Bachelor of Science in Information Technology, State University

# MICHAEL ANDERSON

## LEAD MOBILE BACKEND DEVELOPER

Experienced Mobile Backend Developer with a strong background in telecommunications and mobile application development. With over 10 years in the industry, I have successfully led numerous projects that required complex backend solutions for mobile platforms. My expertise includes working with various databases, such as MySQL and PostgreSQL, and implementing caching strategies to improve performance.

## PROFESSIONAL EXPERIENCE

### Telecom Giants                                   *Mar 2018 - Present*
Lead Mobile Backend Developer

- Led a team of developers in creating a backend system for a mobile billing application, serving over 5 million users.
- Designed database schemas that optimized data retrieval, reducing query times by 30%.
- Implemented caching strategies using Redis, which improved application response times significantly.
- Collaborated with product and design teams to ensure alignment on project requirements.
- Conducted performance testing and implemented improvements, achieving a 95% satisfaction rating in user surveys.
- Mentored junior developers, fostering a culture of continuous learning and improvement.

### App Solutions Inc.                                   *Dec 2015 - Jan 2018*
Mobile Backend Developer

- Developed backend services for a mobile app that connected users to local services, increasing user retention by 35%.
- Utilized PostgreSQL for data management, ensuring high data integrity and reliability.
- Collaborated with QA teams to establish testing protocols, reducing bugs by 25% post-launch.
- Integrated third-party APIs to extend application functionality, enhancing user experiences.
- Participated in code reviews and provided constructive feedback, improving overall code quality.
- Assisted in transitioning to a DevOps model, streamlining development and deployment processes.

## ACHIEVEMENTS

- Achieved a 40% increase in system performance through optimization techniques.
- Recognized as 'Top Performer' within the development team for outstanding project contributions.
- Published a case study on backend optimization in a leading tech magazine.
