

# MICHAEL ANDERSON

## Mobile Backend Developer

Dedicated Mobile Backend Developer with 4 years of experience in the entertainment industry, specializing in backend solutions for streaming services. My expertise lies in developing efficient and scalable applications that cater to a growing user base. I have a strong command of Go and Ruby on Rails, and I have successfully integrated various APIs to enhance functionality.

#### Bachelor of Arts in Computer Science

Creative University  
2016-2020

### SKILLS

- Go
- Ruby on Rails
- AWS
- CI/CD
- REST APIs
- Agile

### LANGUAGES

- English
- Spanish
- French

### WORK EXPERIENCE

#### Mobile Backend Developer

2020-2023

Streamline Media

- Developed backend systems for a streaming application, supporting over 2 million concurrent users.
- Integrated third-party APIs for payment processing, enhancing user experience.
- Optimized data storage solutions using AWS S3, reducing costs by 15%.
- Collaborated with UX/UI teams to improve application performance and usability.
- Implemented CI/CD practices, decreasing deployment times by 40%.
- Monitored system performance and addressed issues proactively, achieving a 99% uptime.

#### Backend Developer Intern

2019-2020

MediaTech Solutions

- Assisted in the development of backend services for a mobile app launching a new streaming service.
- Participated in API development, ensuring seamless integration for user accounts.
- Worked with databases to manage content and user data efficiently.
- Collaborated with senior developers to enhance system security measures.
- Engaged in troubleshooting and debugging, contributing to a 20% reduction in issues.
- Gained experience with Git for version control and collaboration.

### ACHIEVEMENTS

- Improved backend response times by 30% through system optimizations.
- Contributed to a project that won an industry award for best new streaming service.
- Recognized for exceptional teamwork and contributions in sprint planning sessions.
