Michael
ANDERSON

MOBILE QA ENGINEER

As a Mobile Quality Engineer with a focus on healthcare applications, I have dedicated over 6 years to ensuring that mobile solutions meet the highest standards of quality and compliance. My experience encompasses both manual and automated testing, and I have worked closely with development teams to deliver applications that enhance patient care.

WORK EXPERIENCE

MOBILE QA ENGINEER
HealthTech Solutions
2020 - 2025

- Executed comprehensive testing for mobile healthcare applications ensuring compliance with HIPAA regulations.
- Automated test cases using Appium, reducing testing time by 50%.
- Collaborated with cross-functional teams to address user feedback and improve app functionality.
- Conducted usability testing sessions with healthcare professionals to gather insights.
- Developed documentation for testing processes to facilitate knowledge sharing.
- Monitored and reported on app performance metrics post-launch.

QA TESTER
MedApp Innovations
2015 - 2020

- Designed and executed test cases for a suite of mobile applications focused on patient engagement.
- Performed manual testing and defect tracking using JIRA.
- Collaborated with UX/UI teams to ensure the applications met user needs.
- Participated in agile ceremonies to enhance team collaboration.
- Assisted in preparing reports and documentation for regulatory compliance.
- Engaged in training sessions to promote best practices in mobile testing.
