MASTER OF SCIENCE IN SOFTWARE ENGINEERING - TECH UNIVERSITY

ACHIEVEMENTS

- Developed a feature that won 'Best Innovation' at the Fintech Awards 2020.
- Successfully managed a project with a budget of $500K, finishing under budget and ahead of schedule.
- Contributed to a security framework adopted by multiple companies in the fintech sector.

PROFILE

Results-oriented Mobile Systems Engineer with a decade of experience in mobile application development and architecture. My journey began in the fintech sector, where I developed secure mobile banking solutions that prioritized user safety and data integrity. Over the years, I have transitioned to various industries, including e-commerce and logistics, focusing on creating scalable applications that can handle high volumes of transactions.

EXPERIENCE

LEAD MOBILE SYSTEMS ARCHITECT

Finance Solutions Corp.

2016 - Present

- Designed and implemented a mobile banking application, resulting in a 50% increase in user acquisition.
- Established security protocols that reduced vulnerabilities by 70%.
- Collaborated with cross-functional teams to define project scope and deliverables.
- Utilized cloud technologies to enhance application scalability and performance.
- Conducted code audits to ensure compliance with industry standards.
- Provided training and mentorship to junior developers, improving team capabilities.

MOBILE DEVELOPER

E-commerce Innovations

2014 - 2016

- Developed a mobile app that streamlined the shopping experience, leading to a 35% increase in sales.
- Implemented A/B testing to optimize user engagement, resulting in a 20% boost in app usage.
- Worked with designers to create a seamless user interface that improved accessibility.
- Integrated payment gateways, ensuring secure transactions for users.
- Analyzed user data to inform future updates and feature enhancements.
- Participated in Agile sprints, contributing to project planning and execution.
